## FUND MANAGER COMMENTARY AT 31 AUG 2020

The quote "Never let a good crisis go to waste" is attributed to Winston Churchill and is a yardstick by which we have measured our companies over the course of the COVID-19 pandemic. One company which has done particularly well in this regard is **Meituan Dianping**, the Chinese super-app. Meituan wants to become the "Amazon of services" as part of its mission to "Help people eat better, live better". Meituan's central pillar is its online restaurant marketplace and food-delivery platform, which drives high frequency repeat engagement with its users. Meituan has layered on additional functionality, including an online travel agent, restaurant bookings, health and beauty services, grocery delivery, bike sharing and ride hailing, among others. Meituan has used the crisis to establish itself as the industry standard-setter in terms of consumer safety and trust. It has also worked with local municipalities to distribute consumption vouchers, entrenching its position as a preferred partner for both government and business. Meituan's 2Q20 results indicate that the worst is likely past with respect to COVID-19, as revenue and operating profit increased by 8.9% and 95.5% YoY, respectively. Meituan has exceeded our expectations in 2020, rising 33% in August and by over 150% YTD. Nevertheless, given the multiple growth options embedded in the business and management's outstanding execution, we believe Meituan still has a long runway ahead.

\*A feeder fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. The TIC should not be considered in isolation as returns may be impacted by many other factors over me including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 30 June 2020, whilst the underlying portfolios ratio and cost calculations are based upon their most recent published figures, being 30 June 2020.
