

INVESTMENT OBJECTIVE

The **Anchor BCI Worldwide Flexible Fund** aims to provide investors with a moderate to high long-term total return by way of a worldwide flexible portfolio actively investing across different asset classes.

INVESTMENT PHILOSOPHY

The portfolio is a Rand-denominated worldwide fund that has the flexibility to invest in equities, bonds, property and cash both globally and in South Africa. The heart of our philosophy is investing in companies with a durable competitive advantage that are underappreciated by investors and, consequently, trade for less than they are worth. They have enduring qualities and a history of attractive returns on capital. Ideally, they are led by highly talented management teams. The portfolio may, from time to time, invest in listed and unlisted financial instruments. The manager may also include forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

RISK PROFILE: MODERATE-HIGH

- This portfolio holds more equity exposure than a medium-risk portfolio but less than a high-risk portfolio. In turn, the expected volatility is higher than a medium-risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium-risk portfolio, but less than a high-risk portfolio and the expected potential long-term investment returns could therefore be higher than a medium-risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long-term investment horizons.

FUND PERFORMANCE AT 31 OCT 2023 (%)

FUND MANAGER COMMENTARY AT 31 OCT 2023

Changes to the portfolio in 3Q23 included the sale of the stake in Shell, as we purposefully de-carbonise the portfolio, and continued trimming of the investments in Netflix and Spotify. We also partially reduced the rand/US dollar hedge. Equity content ended 3Q23 at 87.6%, down slightly from 88.7% at the end of June 2023. The remainder of the fund consisted of cash and near-cash investments in various currencies, most notably the US dollar (10.5% of the portfolio). Rand hedges were reduced to 12.1% of the fund (i.e., long rand/short US dollar) at the end of 3Q23. If you combine these hedges with local cash and equity holdings, 13.7% of the portfolio was directly exposed to the local currency at the end of the quarter.
